# AtomOS 10.3

## SHOGUN 7

---

### Features:

---

- **3000nit peak brightness enabled**

AtomOS 10.3 unlocks the full potential of the Shogun 7 panel, with a new peak brightness measuring 3000nit\* (+/- 10%) for improved HDR.

Combined with our Dynamic AtomHDR technology, the 3000nit firmware update yields 15+ Stops of Dynamic Range, allowing you see more accurately the image captured at your camera's sensor.

- **High frame rate recording**

Up to 2kp240 DCI/HD for Sony and Panasonic RAW now available.

- **Dolby Vision™ play out\*\***

---

\* Scene dependent.

\*\* Compatible with selected Dolby Vision enabled displays.
